

# Beyond science, the final quest

## New horizons, mathematically Learning from the rishis Of humans and animals

BY OUR SPECIAL CORRESPONDENT

Bangalore, Jan. 11: Riveting speeches by titans of three different subjects were the highlights of the grand finale of the Science and Spirituality Quest II, which concluded in the city after a world-wide sojourn on Saturday.

A brilliant mathematician in Sir Roger Penrose, Professor of mathematics, Oxford University, internationally renowned scientist Dr Jane Goodall and

Bangalore, Jan. 11: Scientific spirituality and spiritual scientists — This is the need of the day for a better world — Sri Sri Ravishankar's message carried clear to the enthusiastic audience at the grand finale of the Science and Spirituality quest series.

Science and spirituality are but two sides of the same coin. "Science is the question, Spirituality is the wonder. Just understand one particle in this universe fully, and you will arrive at the

Bangalore, Jan. 11: Loud hoops of a chimpanzee marked the dramatic call given by famous primatologist Dr Jane Goodall, urging people to decide which half of their nature they would develop — the dark or the light? "I want to leave light foot prints in the world," she says.

In what followed as a passionate speech that can be only given by one who loves animals, Dr Goodall, expressed her horror at the destruction of animal habitats lead
